HMP Core Microbiome Sampling Protocol A (HMP-A) Distribution Set 1

This manifest summarizes the contents and use policies for the distribution set **Human microbiome research** in the study referenced above. A copy of this manifest is included in the distribution package under filename .

Distribution Set Description

The data of this distribution set (phs000228.v4.p1.c1) is collected from 300 participants. The contributing institutions have established that the data can be distributed for Human microbiome research (HMP).
